4 Amazing and Extensive Model Train Displays Offered at Public Auction

RAILROADS ON PARADE

"The Model Railroad Extravaganza" An **AMAZING** model train attraction created by Broadway Set Designer Clarke Dunham, currently on display as a museum attraction known as "Railroads on Parade" located in Pottersville, NY. The attraction consists of 4 separate model train layouts / displays, as follows:

THE STATION
New York City Subways

The Hell Gate Bridge
1939 WORLD'S FAIR

These Fully Complete, Functional Model Train Layouts will be offered at auction as a whole, as well as individually. This exhibit has been maintained and updated over the years and is currently in need of only minor repairs.

The Total Exhibit "By The Numbers"

- **5,000 Square Foot Exhibit**
- **3 Train Sizes (O, S & HO Scale)**
- **1,775' of Track**
- **33 Animations**
- **Construction** of wood framing with T-111 bases
- **Foundations** made of carved blown Styrofoam over sheets of carved solid Styrofoam (except NYC Subways which is wood)
- 100's of **Buildings** including numerous custom models & classic buildings from kits
- **57 TRAIN CAPACITY**, controlled by series of sensors in a block system similar to that used by metropolitan subway & commuter trains (normally runs 50 trains).
- **Complete Lighting System** (approx. 500 lighting units) Complete system included if exhibit is purchased as a whole. If layouts are purchased individually (except The Station), lighting system not included. Ceiling track lighting and display lighting, all bulbs used are custom-designed theatrical colors; all lighting controlled from The Station Display. Lighting turns from day to night every 3 minutes automatically.
- **Backdrops** are wood framed canvas covered plywood (The Station) and wood framing with computer printed images on Sintra panels (all others).
- **Plexi-Glass Audience Barriers, Wooden Railings** built to museum specifications and some hanging signs/pictures included with exhibits as currently present at museum.

THE STATION DISPLAY

HISTORY - The Station is known to many New Yorkers and others, as it was a holiday staple in Manhattan for nearly two decades, attracting millions of visitors.

The Station is an intricately detailed display of seasonal life in the 1940's and 1950's.

In 2008, the display lost its home in the Citigroup building in midtown Manhattan and since was relocated to Pottersville, NY, as the main display in a model railroad museum attraction.

The Station Details:

- Tracks: 4 tracks on 3 levels run around whole perimeter of display; approx. 750' of track
- Train Sizes: O, S and HO
- # Trains: 32 train capacity (currently running 28-30)
- # Animations: 28-30 including working drive-in movie theatre, neon ad signs & lighted billboards
- # Buildings: Many plus backlit art-deco style plexi New York skyline scene
- Display Size: Propeller shaped (triangular); Approximately 42' to a side, 3 sides; 14' to top of control booth; Fills 2 - 53' air ride tractor trailers with load bars.

The Hell Gate Bridge Display

HISTORY - The Hell Gate Bridge Exhibit, is fashioned after the real Hell Gate Bridge which spans the East River between Astoria (Queens, NY) and Randall's Island (just off New York City). Because of the wild whirlpools beneath it, which have sucked many boats down to their doom, that stretch of the East River is known as 'Hell's Gate'.

The 16' Hell Gate Bridge spans the ceramic town of 'Hope'. The exhibit is enormous by model train standards . . . Over 110' long and sports a massive wooden trestle, three hand-covered bridges, tunnels through the mountains.

The Hell Gate Bridge Details:

Track: Approx. 750' of O gauge track and 30' of HO gauge track
Train Sizes: O and HO
Trains: 14 train capacity (all O gauge except 1 HO gauge)
Animations: 3
Buildings: Many incl. a whole Department 56 Christmas Village scene
Display Size: 110' long dog-bone shaped with Hell Gate Section (Hell Gate bridge measures 16' long including approaches); Exhibit 12' high with backdrops; Hell Gate Section (center of layout) is approx. 6' deep with two ends being approx. 10' deep.

1939 WORLD'S FAIR DISPLAY

1939 World's Fair Details:

Track: Approx. 25' of HO gauge for back and forth motion
Train Sizes: HO
Trains: 5 train capacity
Buildings: Many hand-crafted buildings incl. the iconic Trylon and Perisphere
Display Size: Height to top of portal is 12'; incl. portal comes to 25'6"; 6'2" Deep

History - The World's Fair Exhibit is a view of the 1939-40 World's Fair in miniature with its two fabulous futuristic symbols: The 700 foot tall Trylon and the Perisphere.

The heart of the display is called "Railroads on Parade" which uses period locomotives to tell our country's history using the famous 'dancing' locomotives, which didn't 'dance', but came forward, met, and backed up, with each pair representing a different era.

New York City Subways Display

New York City Subways Details:

Track: Approximately 200' of track in 2 Loops & 4 back & forths
Train Sizes: HO
Trains: 6 train capacity
Buildings: Many wooden city towers of New York
Display Size: Height to top of portal is 12'; including the portal, the width is 24'3"; 6' deep

HISTORY - The New York City Subways Exhibit, was developed with a bit of artistic license and slicing down the center of Park Avenue. A literal upstairs/downstairs vision of NYC, this exhibit portrays the tall familiar Park Avenue buildings looming over the activities below. The first level under the sidewalk carries trains to and from Grand Central Station, with two subway levels below that. All of these subway lines keep moving; alive day and night like the city itself.
